12330 Cary Cir., LaVista, NE 68128 Ph: 531-329-4400 www.theamericanfencecompany.com

Core Competencies

American Fence Company is not your typical fence contractor. We are an extraordinary security contractor. Our company is composed of a series of teams and divisions of professionals that make us your ultimate choice in providing a complete fence, access control and security solution.

American Fence Company is one of our Nation's top ten largest fence contractors. Our core competencies are the highest security installations, sophisticated access control systems, vehicle crash barriers and engineered custom metals.

American Fence Company can prove it. You will find our installations from the base of the Grand Canyon to the midst of the Yellowstone Forest. We are also the first defense for some of our Nation's nuclear power plants and most significant military installations. Our custom metals projects reach from coast to coast. We appreciate and respect our relationship with several data centers.

Differentiators

- Our custom metals division is top notch. We are the only Midwest fence contractor with CSI Section 5500 capabilities. With a team of engineering, drafting, experienced certified welders and a 50,000 square foot facility, we are capable of providing all custom and miscellaneous metals. Our welders are AWS D1.1 & D1.2 certified to 6G.
- New CRM = better customer experience. American Fence has invested significantly into the creation of the first of its kind outdoor solutions provider task and completion driven CRM software. This new CRM software is fully operational with new modules being continually added to enhance efficiency and crew performance.
- Project managers lead to better project management. American Fence Company has employed commercial and residential project managers to champion a better customer experience. In the last two years, we have successfully launched project managers into every branch.
- American Access Company is a division of American Fence Company. Our access control division is a team of access control professionals who are professionally trained and focus exclusively on gate access systems. Since 2017, American Fence Company recognized that our industry's fence contractors have not risen to the demand of today's gate access control systems. Thus, we decided to outwardly commit to this demand by creating an entire division committed to providing solutions.
- Our belief in team makes the difference. American Fence Company has over forty company installation crews. We believe that your employees support what we collectively create. In the last three years, we have significantly increased employee wages and added multiple benefit packages including additional PTO. We are building a sustainable employee group of professionals.
- We cannot wait for you to ask about our safety program. Our program is a multiple prong approach to safety which has led to a .71 MOD rate. It is expansive, impacting and results driven. American Fence Company has achieved four consecutive years of reduced MOD rates. We have created dozens of industry specific safe practices and equipment certification programs. Our installation crews are required to meet the highest safety standards that include CDLs and 30 hour OSHA.
- Size matters. American Fence Company operates ten branches and multiple divisions in eight different states. Our 300 plus employees matter. American Fence Company has performed work or delivered finished products to every State within the continental United States.
- Our wheelhouse is spacious. We have installed several hydraulic wedges and bollards, DoD certified crash rated barriers, speed gates, crash rated barrier arms, and high speed operators.

Divisions

American Fence Company:

American Fence Company is one of the Nation's top 10 largest fence contractors. We are equipped with a vast inventory, over forty company installation crews, and hundreds of years of experience.

American Access Company:

American Access is a service group that provides turnkey automated access control systems materials and installation. With a team of AFA certified technicians and installers, we are the Midwest largest provider of automated gates.

American Fence Rental:

American Fence Rental is the most competitive temporary fence and barricade provider in the Midwest. We have thousands of temporary panels, post, fabric and barricades and are always on-hand ready for delivery and installation.

America's Gate Company:

America's Gate Company has over 55 years of experience in gate design, fabrication and installation. We offer fully engineered structural and decorative gates, selling gates across the entire United States.

American Playground Company:

American Playground Company is the Midwest's premier playground and recreational contractor. From design to installation, our in-house team of experienced project planners, installers and inspectors will ensure that your playground, park, sporting and other outdoor recreational areas are perfect from start to finish.

IronShield:

Our IronShield division boasts a 2,400 square ft powder coating booth to coat your projects. We media blast, chemically etch, powder coat and wet coat your custom metals projects.

PalmSHIELD:

PalmSHIELD boast a complete line of architectural screen systems ranging from louvers, perforated metal screens, bar grating, cable railing, wire mesh, full packaged enclosures and more. We are the nation's largest provider of free standing engineered screening systems.

Past Performance

Our team provides protection to our Nation's most critical infrastructure. Listed below are just some of our more significant installations.
